

The Department of Justice published revised final ADA regulations for state and local government services, public accommodations and commercial facilities on September 15, 2010.

**But what does this mean for you?
Answers to your ADA questions.**

Q: Does my pool need a pool lift?

A: Yes, any commercial pool with 300 linear feet or more needs two means of access. All hotel and commercial pools will need an ADA compliant handicapped entry.

Q: What is a commercial pool?

A: Any pool that is open to the public at any time, receives government funding, or receives revenue from the pool such as membership dues.

Q: Does my spa, wave action pool, leisure river, wading pool or sand bottom pool need a pool lift?

A: Yes. They all need on access point. A wading pool must have a sloped entry. A spa must have a pool lift, transfer wall or transfer system.

Q: How do I know if my pool lift is ADA compliant?

- A:**
- 1. Purchase your lift from an Aqua Creek distributor, like Ganga Hospitality.**
 - 2. Lift must have a capacity of 300 lbs or more.**
 - 3. Lift must have solid seat and footrest. Sling seats styles are not compliant and should be replaced.**
 - 4. Lift must be self operable from the deck and the water. A lift with manual rotate or hand crank is not compliant and should be replaced.**

There are also specific requirements for clear deck space and water depths. Contact your Ganga Hospitality representative for more information. Always check your local codes for additional requirements.

Law went into effect March 15, 2011 with a date of mandatory compliance of March 15, 2012

**YOU MAY BE ELIGIBLE FOR
A FED TAX CREDIT OF UP
TO \$5,000.**
